Topic of discussion
Algebra with some applications

Algebra is one of the oldest branches in the history of mathematics that deals with number theory, geometry, and analysis. The definition of algebra sometimes states that the study of the mathematical symbols and the rules involves manipulating these mathematical symbols. Algebra includes almost everything right from solving elementary equations to the study of abstractions. Algebraic equations are included in many chapters of Mathematics which students will learn in their academics. Also, there are several formulas and identities present in algebra.

As part of Fibonacci day celebration Department of Mathematics organized a National Seminar, Dr. Gireesh KP., Asst. Prof. MES Kalladi College, Mannarkkad, was the Resource Person and he handled the session on Algebra with some applications.
